1. CHANGES IN THE MANAGEMENT BOARD

1.1 Karl-Joachim Veigel no longer CEO

Since 21 September 2005 Mr. Karl-Joachim Veigel is no longer chairman of the board of Beta Systems Software AG (BSS, ISIN DE0005224406). Veigel and the company agreed on the separation. Obviously the supervisory board drew the consequences because of the enterprise results of the last quarters: The operational results in the last quarters, after the takeover of Kleindienst Datentechnik did not succeed as planned. It is to be considered that Veigel performed well since his office entrance in 2000 up to 2004 (takeover of Kleindienst was consolidated in Q2/2004). Mr. Dietmar Breyer (ex-CEO of Kleindienst) becomes Deputy chairman of the board. He will takeover the presidency in the board of directors for a transitional phase. Furthermore the supervisory board appointed Mr. Kilian Krieger with effect from 4th October 2005 for the divisions Finances, Controlling and Personnel Affairs (thereby taking over the responsibilities previously held by Mr. Veigel). The productivity program "Growth and Profit 2005" starting in 2005 with the measures of restructuring, reduction of costs and integration measures are not in danger in our opinion. We expect a regular implementation up to the year end.

1.2 Facit

Beta Systems Software AG is still busy at present with internal restructuring processes (takeover of Kleindienst Datentechnik as well as the responsibilities within executive board). Additionally there still is a weak demand within the IT sector and a weak macro economic situation. Regarding its strategic adjustment Beta Systems is well positioned. In the segment Enterprise Content Management, an important business field for the company, Beta Systems covers nearly all Western European countries together with distribution cooperations, while Kleindienst Datentechnik is strongly positioned in Germany and in growing Central- and Eastern Europe. Therefore we calculate sales- and earnings-growth in the medium term. In Q4/2005 we expect a recovery but a weak result for total 2005 (minus € 2.9 million from current business activity and altogether plus € 2.1 million due to the sale of the business segment Outsourcing Services. In the business segment ID/Security (administration of digital identities with SAM Jupiter) we expect sales of only € 14,3 million in 2005. Starting from 2006 we assume a significant recovery based on the newly developed open system version of the Security administration manager (SAM). Starting from 2006 we estimate sales growth and again pretax profits (see chapter 2; 2.1; 2.2 and 2.3). In 2 years we estimate an EBIT-margin of at least 7%, particularly supported by further cost savings (program "Growth and Profit 2005"). We expect strongest growth in the business segments ECM (Enterprise Content Management) and Security Management. The Research & Development section of these business segments amounts to approx. € 10 million and should be an EBIT-driver for the next financial years.

Our Recommendation: **HOLD (unchanged)**.

2.1 Our unchanged estimates for Q3 and Q4/2005

The following table clarifies the development of the individual business segments. Additionally please see our estimates for Q3 and Q4/2005.

In the lower part of the table please see the additional result from not continued business: The purchase price obligation of the sale of Outsourcing Service business amounted to € 10,35 million and was settled in full. The profit on disposal associated with this transaction was € 5.1 million and was recognized in the second quarter of 2005. This is the profit net of tax and operating loss up to effective date on April 30, 2005.

	Q1/2005 Revenues	Q2/2005 Revenues	Q3e/2005 Revenues	Q4e/2005 Revenues	2005e Total Revenues

2.2. Unchanged estimates for 2005 until 2008

See our estimates for 2005 until 2008 in our last company update from August 15th. **On the basis of our three-stage discount cash flow model we calculate a fair value of € 13,30 and recommend the stock to hold (unchanged).**

2.3 Graphics on companies development from 2003 until 2005e

In following graphic you can see the development of Beta Systems sales-, EBIT- and EBT-figures in the last three years (inclusive Q3e and Q4e/2005). The operational cycles of Beta Systems become clearly visible, which are typical for software producers and IT consultants: Each Q4 of a year shows best results compared to the others quarters. The highest sales figure with € 39.6 millions was obtained in Q4/2004. EBIT amounted to € 6.2 millions (also EBT).

3. APPENDIX

3.1 Market impulses and trends for Beta Systems

- The market for Identity management is growing fast. Security solutions are being given top priority in IT budgets.
- In the market segment Enterprise Content Management (ECM) the subranges document management, input and output management as well as archiving grow together. Total conceptions are required by institutions/ customers.
- Regarding ECM research institutions expect an average growth rate of 8%
- Offerers are advantaged when they can offer solutions on all relevant platforms such as Windows, Unix, Mainframe and also in the open SOURCE (Linux) segment.
- IT systems become increasingly more integrated and more complex.
- Web-based company portals are being created with the express purpose of ensuring flexible processes and minimizing the level of complexity for users. Enterprises therefore need solutions for safe and fast software solutions, which are simply maintained and affordable.
- IT systems must master the integration of business processes. Information technology has to serve specific business objectives and generate benefits that are quantifiable.
- End-to-End Solutions: The advantages lies with software enterprises which can identify and examine detailed documents (e.g. health insurance customer documents as well as correspondence. A digitization along the entire value chain of an enterprise lowers costs and increases efficiency. The software concepts of Beta Systems reduce the expenditure for the manual input process for incoming mail by approx. 20%. The reduction of the expenditure for correct processing is approx. 80%.

3.2 Profit- and loss account until 2008
