PSI AG

Q3 with Disappointing Energy but Surprising Production

- New orders came in strong increasing 13% to €17.3m lifting the order backlog to €124m. Revenues and earnings on a group level came in at our expectations. Disappointing margins in the energy segment were fetched by a strong performance in the production segment. While the financial expenses stayed stable the tax burden increased. Combined all effects resulted in a quarterly net income equal to previous year and earnings per share of €0.09. The cash flow from operations rose by 35% increasing the company's liquidity cushion to €29,6m.
- Whereas revenue increased slightly in the energy segment, the earnings result came in disappointing. Margins deteriorated due to investments in the export structure and energy network infrastructure almost doubling the operating expenses while material expenses decreased considerably and labor costs stayed stable. The recent dynamic developments together with an uncertain regulatory environment prolonged the planning phase of energy operators' sizeable investments. However we expect the first orders to step in by mid-2012.
- The results in the segment production came in surprisingly good representing its best year-to-date third quarter performance since years. While material costs grew slightly less, labor costs only grew half the rate of revenue growth, showing effects of scale. As a result quarterly margins increased to double digits. New orders came in from steel manufactures who are expecting increased demand of steel tubes due to the global pipeline buildup. During the last quarter the entry in the Asian market succeeded in the area of commodity extraction and several new logistics contracts could be signed.
- In the infrastructure segment several large scale contracts during the last quarters were signed amounting to a large order backlog in the segment. The company expects this to contribute to an increase in revenues and earnings at the end of this year.
- As the kick-off in the smart grid arena takes longer than anticipated we adjust our revenue forecasts downwards by 2%. The company revised its EBIT guidance for the current year to €11m. Investments in the energy segment came in larger as expected and a pickup in business is a necessary step in achieving the company's goal of double digit margins. We believe the company will meet the upper end of its renewed EBIT guidance at the end of this year and adjust our estimates downwards from previous €13m. This results in a target price of €20.00. Our investment case remains intact. Concluding, we rate the stock of PSI AG as a BUY.

Quarterly Results – Segment Energy

External Revenues in m Euros, Total Revenue Margins

Source: Company

Quarterly Results - Segment Energy

Operating Expenses in m Euros, Depreciation

Source: Company

Whereas revenue increased slightly in the **energy segment**, the earnings result came in disappointing. Margins deteriorated due to investments in the export structure and energy network infrastructure almost doubling operating expenses while material expenses decreased considerably and labor costs stayed stable. According to the company the investments will enable it to increase the share of maintenance revenues from orders related to the smart grid area in 2012. The recent dynamic developments together with an uncertain regulatory environment prolonged the planning phase of energy operators' sizeable investments. However we await orders to step in by mid-2012.

External Revenues in m Euros, Total Revenue Margins

Source: Company

When looking at the performance of the **infrastructure segment** keep in mind the sold telecommunications unit at the end of 2010. Several large scale contracts during the last quarters were signed amounting to a large order backlog in the segment. The company expects this to contribute to an increase in revenues and earnings at the end of this year.

2. Investment Case

Strong Market Position We view PSI's competitive position as very strong and stable. PSI enjoys a first mover advantage in many of its product areas. It is the leader in volume in many of its markets and its software products carry unique features making it a quality leader in further market niches where it endeavors the position as volume leader. We view its success as the result of the company's focus on its core competency in network control systems and experience in this area, the ability to spot market trends and innovate having a highly specialized workforce and last but not least the company's pilot project development approach.

Dynamic Growth Potential All company segments envision organic and inorganic growth. In the energy segment the development of a smart grid in Germany's medium-voltage system should trigger orders as soon as utility providers face a stable regulatory environment and concluded their infrastructure plans which we currently expect to be the case next year. Adding to this dynamic with a lag, the development of a smart layer in the low-voltage system is expected with the timing depending on the growth of renewable energy production among households and firms. Germany is a forth comer with the development its electricity network due to high costs and the trend in renewable energies which both should be enforced by the recent decision to exit nuclear energy. As a first-mover and current market leader PSI will be able to export its products in the long-term if other countries follow Germany's approach. However the scale effects from exports will be bounded by the fact that foreign networks are very different and considerable software adjustments are expected to be necessary. In the developing markets smart grid products will not be able to include a forecast related software component due to lack of data, diminishing the efficiency and therefore attractiveness of a smart grid establishment.

As the leading software developer in the steel market worldwide the production management segment faces further growth potential through the in 2010 developed mining control system. Already customers from China have acknowledged interest in the product. A further strong sales channel for the product to existing steel customers could develop if the trend of vertical integration by steel companies facing fluctuating input prices continues.

The segment of infrastructure not only produces stable revenue streams through a large share of government

related contracts, but also growth potential due increased need of traffic management systems in the increasing metropolitan areas around the world.

Business Risk Overall PSI's customers are from very cyclical sectors. The exposure to business cycle risk is somewhat diminished by the fact that the company delivers products mainly related to efficiency and cost cutting gains. The company works on increasing its share of large rollout contracts enabling it to receive large upfront payments and a larger share of maintenance revenue resulting in a more stable the revenue stream and higher cash flow.

Margin Improvement Expected We expect margins to increase as software related revenues are expected to increase, especially due to the high growth in the energy segment. The effect will be enforce though a lowering of costs through the lower product development costs and costs of finishing the product platform and related gains in efficiency. Labor costs are expected to decrease as the production of standardized product features will be moved to Eastern European markets where mathematically skilled labor force is available. We view the near-shoring together with the newly developed product platform as strategically important factors. They free capacity of the highly specialized inland workforce such as electrical engineers with software skills which can so forth focus on innovations. This lessens the dependence on the tight software engineering labor market.

3. Stock and Shareholder Structure

Stock Price Development

Source: Reuters, Own Calculations

Shareholder Structure

Source: Company

Since the beginning of September the stock is part of the TecDax which should increase the liquidity in the shares. There exists speculation among investors and analyst about PSI being an attractive takeover target which could provide a bottom to the stock price performance.

4. Conclusion

As the kick-off in the smart grid arena takes longer than anticipated we adjust our revenue forecasts downwards by 2%. The company revised its EBIT guidance for the current year to €1m. Investments in the energy segment came in larger as expected and a pickup in business is a necessary step of achieving the company's goal of double digit margins. We believe the company will meet the upper end of its renewed EBIT guidance at the end of this year and adjust our estimates downwards from previous €13m. This results in a target price of €20.00. Our investment case remains intact. Concluding, we rate the stock of PSI AG as a BUY.

6. Valuation

6.1.DCF-Model

In order to determine the fair value, we established a three-stage discounted cash flow model and used market data for peer group companies. All data are based on the consolidated financial statements.

Through discounting operative free cash flows to the valuation date we accommodated the during the period valuation date. As the valuation date we chose the first of November 2011. As far as non-operating assets are concerned, their value was derived separately and added to the present value of payouts.

Tying in with this, the phase of terminal value follows, for which we calculated with a growth rate of 2.5% p.a.

/ Discounted Cash Flow-Modell (Basis 11/2011)

Gearing	2,7%
WACC	8,84%

Adjustments for debt to current interest were not made. Risk free profitability is based on the average profitability of the 30-year treasury bond.

Figuring a risk prime follows the capital asset pricing model (CAPM) and covers in particular the systemic risks (market risk prime esp. company specific risk). The beta value we used to identify the company specific risk is based on the performance of the reference index DAX.

6.3. Fair Value – Sensitivstes

Our derived fair value per share amounts to EUR 20.01. This implies an upside potential of 23.6 % to the current share price (EUR 17.21). The modification of the action parameter in terminal value is shown below in the sensitivity analysis. It shows variance in our derived fair value in variant scenarios.

Sensitivity analysis		Fair value per share				
(EUR)		Discount rate				
$\beta = 1,03$		8,34%	8,59%	8,84%	9,09%	9,34%
Growth	1,5%	20,36	19,50	18,71	17,98	17,29
	2,0%	21,10	20,17	19,31	18,52	17,78
	2,5%	21,98	20,95	20,01	19,14	18,34
	3,0%	23,01	21,87	20,83	19,87	18,99
	3,5%	24,27	22,97	21,79	20,73	19,75

Sensitivity analysis		Market capitalization				
(EUR m)		Discount rate				
$\beta = 1,03$		8,34%	8,59%	8,84%	9,09%	9,34%
Growth	1,5%	319,59	306,22	293,80	282,22	271,41
	2,0%	331,31	316,73	303,24	290,73	279,10
	2,5%	345,03	328,96	314,18	300,54	287,92
	3,0%	361,32	343,37	326,98	311,95	298,12
	3,5%	380,96	360,61	342,18	325,41	310,08

Appendix

Segment Energy

PSI Division Electrical Energy

PSIcontrol:	Control system for managing electricity grids.
PSIcommand:	Assignment system for maintenance and disturbance management in energy networks.
PSIpassage:	Grid utilization management for operators of electrical transportation and distribution grids.

PSI Division Gas and Oil

PSIcontrol:	Control system for the oil and gas market.
PSIcomcentre:	Modular communication system for communication amongst market participants in the energy market.
PSIfetch:	Remote meter readout, remote parameterization, monitoring of incoming calls for the gas market.
PSIganesi:	Network simulation system for the gas market.
PSIpipelines:	Pipeline management system for oil and gas pipelines.
PSItransport:	Transportation management system for the gas market.

PSI Büsing und Buchwald GmbH

DAISY:	System for the allocation and invoicing of special contracts in the liberalized gas market.
GAPS:	Analysis and planning system for the gas sector.
PSImarket:	Energy trading and sales system.
R-Win®:	Solution for the technical auditing and calibration of gas metering systems.

PSI Nentec GmbH

PSIcontrol/FG:	guaranties a flexible, scalable and secure process interfacing of telecontrol substations to the control center in the area of energy
PSIcommand/CBX:	The CommBox is a powerful on-board unit for telematic applications inside emergency vehicles.

Segment Production

PSI Production GmbH

PSImining:	Instrumentation and control of the production supervision of mines.
PSItraffic:	Supervision and visualization of the infrastructure of the traffic telematics.

PSI Metals Group

PSImetals:	Complete sector solution for the entire value added chain in the metals industry.
------------	-----------------------------------------------------------------------------------

PSIPENTA Software Systems GmbH

PSImes:	Modular Manufacturing Execution System for manufacturing companies.
PSIpps:	Production and Planning System (PPS) for the machine and plant construction industry and the automobile.
PSIpenta:	Enterprise Resource Planning (ERP) solution for the machine and plant construction and the automobile industry.
PSImaintenance:	Solution for the maintenance and repair of machines, plants and vehicles.

PSI Logistics GmbH

PSIglobal:	Software for planning, analysis and optimization of logistics networks.
PSItps:	Optimizes transportation processes, supports routine activities, assures transparency in the transportation planning.
PSIwms:	Warehouse Management System for industrial and logistics companies.
PSIcontrol:	Control System for visualization, tracking and tracing of logistics processes.
PSIairport:	Solutions with a focus on passenger, baggage and cargo handling.

F/L/S Fuzzy Logik Systeme GmbH

Qualicision®:	Qualicision® is a software and consulting concept aimed at assuring and optimizing the process quality by means of intelligent data collection, analysis and balance between target and criteria conflicts.
---------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Segment Infrastructure

PSI Transcom GmbH - Division Public Transportation

<i>PSItraffic:</i>	PSItraffic is a powerful automated platform for visualizing, monitoring and dispatching as well as for managing vehicles and transport processes in public transport.
<i>PSItraffic/ITCS:</i>	Automated Vehicle Management for buses, trams and trains in public transport, group call.
<i>PSItraffic/Info:</i>	State-of-the-art passenger information, innovative display technologies, passenger information via internet or mobile devices, acoustic announcements.
<i>PSItraffic/Depot:</i>	Depot Management for buses and trams with fully automatic disposition, failure management, central control of unmanned depots, real-time RFID-tracking.

PSI Transcom GmbH - Division Safety

<i>PSIcontrol:</i>	Control system for monitoring data and predicting environmental disasters.
--------------------	----------------------------------------------------------------------------

DISCLAIMER

BUY	On a basis of our prognoses the stock should have a performance of at least 10% in the following 12 months.
ACCUMULATE	On a basis of our prognoses the stock should have a performance of between 5% and 10% in the following 12 months.
HOLD	On a basis of our prognoses the stock should have a performance of between minus 5% and plus 5% in the following 12 months.
REDUCE	On a basis of our prognoses the stock should have an underperformance of between minus 5% and minus 10%.
SELL	On a basis of our prognoses the stock should have an underperformance of at least minus 10%

Additional Disclosure/Erklärung

DR. KALLIWODA | RESEARCH GmbH prepared this analysis on the basis of broadly accessible sources, which are regarded as reliable. We work as precisely as possible. We cannot however guarantee for the balance, precision, correctness and wholeness of the information and opinions.

This study does not replace personal advice. This study is not regarded as invitation to the purchase or sale of the installation-instruments discussed in this study. Therefore, DR. KALLIWODA | RESEARCH GmbH advises to turn to your bank-advisor or trustees before an investment-disposition.

In the United Kingdom this document is only intended for distribution to persons described in Section 11(3) of the Financial Services Act 1986 (Investments Advertisements) (Exemptions) Order 1996 (in the latest amended version), and may not be passed on either directly nor indirectly to another group of persons. Neither this document nor a copy thereof may be sent or taken to or distributed in the United States of America, Canada or Japan or their territories or possessions nor may it be distributed to a US person as defined by the terms of the US Securities Act 1933 or to persons resident in Canada or Japan. Distribution of this document in other jurisdictions may be limited by law and persons in possession of this document should inform themselves of any restrictions and comply with these. Any failure to comply with these restrictions may represent a breach of a current securities act.

DR. KALLIWODA | RESEARCH GmbH as well as co-workers may hold positions in any securities mentioned in this study or in connected investments and may increase or sell their holdings in these securities or connected investments.

Possible conflicts of interest

Neither DR. KALLIWODA | RESEARCH GmbH nor any affiliated company

- a) hold an interest of 1 percent or more of the equity capital of the company being covered in this report;
- b) were involved in an emission of investments that is object of this study;
- c) hold a net-sale position of the shares of the analyzed business of at least 1 percent of the share capital;
- d) have serviced the analyzed investments based on any contract with the emitter on the stock exchange or in the market.

There is a contractual relationship only with the business of PSI AG and DR. KALLIWODA | RESEARCH GmbH for the preparation of research studies.

DISCLAIMER

The information and opinions in this analysis were prepared by DR. KALLIWODA | RESEARCH GmbH. The information herein is believed by DR. KALLIWODA | RESEARCH GmbH to be reliable and has been obtained from public sources believed to be reliable. With the exception of information about DR. KALLIWODA | RESEARCH GmbH, DR. KALLIWODA | RESEARCH GmbH makes no representation as to the accuracy or completeness of such information.

Opinions, estimates and projections in this report constitute the current judgement of the author as of the date of this analysis. They do not necessarily reflect the opinions, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate, except if research on the subject company is withdrawn. Prices and availability of financial instruments also are subject to change without notice. This report is provided for informational purposes only. It is not to be construed as an offer to buy or sell or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy in any jurisdiction. The financial instruments discussed in this report may not be suitable for all investors and investors must make their own investment decision using their own independent advisors as they believe necessary and based upon their specific financial situations and investment objectives. If a financial instrument is denominated in a currency other than an investor's currency, a change in exchange rates may adversely affect the price or value of, or the income derived from, the financial instrument, and such investor effectively assumes currency risk. In addition, income from an investment may fluctuate and the price or value of financial instruments described in this report, either directly or indirectly, may rise or fall. Furthermore, past performance is not necessarily indicative of future results.

This report may not be reproduced, distributed or published by any person for any purpose without DR. KALLIWODA | RESEARCH GmbH's prior written consent. Please cite source when quoting.
